HUBER Solutions for the Treatment of Domestic Waste Water for Reuse

Process water is treated wastewater that can be used for irrigation or as service water in the building, e.g. for flushing the toilet or laundry.

We generate process water from domestic wastewater of various kinds with our following solutions:

- **HUBER solution GreyUse® for recycling gray water for reuse**
- **HUBER Solution for decentralized treatment and reuse of wastewater in large buildings**
- **HUBER Solution for semi-central treatment and reuse of wastewater**

With our HUBER Solutions wastewater is not only a source of water, it can also be a source of heat. Our **HUBER Solutions for heating and cooling** with sewage are energy efficient and environmentally friendly.
